

Kaltura Everywhere

Besides stand-alone videos as described in Getting Started with Kaltura you can also have The videos appear as part of your discussion, blog or items created in Blackboard. In addition you can use the embed link to add the video to your department, course or personal website.

Kaltura Video as Part of Blackboard Tools

1. You can add a new or previously recorded Kaltura video to any text box within Blackboard. To do this look for the **Mashups** button while creating you Discussion Board, Blog or Item in Blackboard.

2. Click the **Mashup** button and choose **Kaltura Media**. You can then select existing video to use or record a new one. See Getting Started with Kaltura for detailed instruction on recording and embedding.

3. Once you have added any text you need and added the video you can click submit. The finished post will look like this for an Item.

4. Video in Discussion Board post.

Kaltura Everywhere

Kaltura outside Blackboard(embed code)

1. You can also add your Kaltura videos to places outside Blackboard such as your Department, School or personal website/blog. To do this you will need to go to **Control Panel**→**Course Tools**→**Media Gallery**. There click the plus [+] icon in the bottom right of your video and choose **Edit**.

2. At the bottom of **Edit** screen click **Go to Media**.

3. On the media screen click the **Share** button.

4. Below the blue **Embed** button you will find the code you need to copy and paste into your website. You can also choose setting such as players size and appearance(skin). If you are unsure how to do this ask the tech support for your hosting service or your web content manager for assistance.

Embed

```
amp;flashvars[sidebar.container.clickToClose]=true&flashvars[chapters.plugin]=true&
